

Mid/Senior Backend Engineer

Description

Tap Slots is a leading developer of casino, free-to-play games for smartphone and tablet devices. We're looking for a full-time Backend Engineer to join our Las Vegas studio. If you're a passionate backend developer and gamer, who has shipped backend software at scale, know the tricks and shortcuts to quickly develop that create amazing user experiences and are motivated to take the next step in your career, we would love to talk with you!

Responsibilities

- Work in a fast paced collaborative development environment with engineers, artists, designers, and project managers
- Ability to quickly build systems that function efficiently at scale
- Willingness to take ownership of tasks and champion their success
- Be an integral part of developing the infrastructure for new systems and services
- Write bug free code, test code using unit and integration tests, reduce edge cases during implementation, and fix bugs as they arise
- Right attitude to rapidly and frequently iterate on tasks until it acts as expected with the understanding that feedback is the beginning of a conversation that will lead to a better product
- Create tools and system for internal and external use
- Adeptly develop secure code and endpoints employing encryption in transit and at rest
- Comfortable working in Node.js systems to fix bugs, extend features, and occasionally add new features

Requirements

- Bachelor of Science or higher in Computer Science or equivalent
- 3+ years of experience in similar capacity, preferably in game industry
- Strong communication skills, both verbally and written
- Experience developing performant solutions at scale
- Php, Node.JS, TypeScript, Bash Experience
- Jenkins CI, Jenkins Pipeline, and Groovy Experience
- Continuous Integration and Deployment
- AWS Architecture and Services Experience
- Have shipped large backend services that function at scale
- Familiarity with REST APIs, CRUD APIs
- Proven track record for working independently and collaboratively in a dynamic team setting
- Comfortable working on Windows, Mac, and Linux

Bonus Points

- Familiarity with slot machines and other casino games
- Jira, Confluence, Bitbucket experience
- Experience with DevOps
- Unity, iOS, and Android experience
- Mobile video game experience with a focus on interfacing with Unity 3D
- Experience working in agile game development (Scrum and Kanban)
- Serverless architecture experience

Why you should work for us

- A casual, fun and energetic work environment near The Strip in Las Vegas
- Free Lunches (Every Day)
- A challenging job with lots of responsibility and freedom to grow professionally and acquire new skills
- A very international team of fun and passionate colleagues
- Free endless supply of snacks and soda, a gym, and a gaming room
